

CADRAN SOLAR CUBIC MULTIPLU

<http://cerculdestele.blogspot.com>
MATERIAL GRATUIT !

Figurile se decupează pe contur, se pliază pe liniile punctate, apoi se atașează prin lipire conform schemei de corespondență. Triunghiurile A, B, C se lipesc în plan perpendicular pe sectoarele circulare aferente, urmărind direcția liniilor mediane. Indicatoarele D și E se lipesc în plan perpendicular pe laturile estice și vestice, de-a lungul liniilor special marcate.
